

Inside the scene, aligned models add hesitation and guilt

Median over 32 base>aligned pairs of each pair's rate, bootstrap 95% intervals; the unit is the PAIR. Labels: median PAIRED change (pp) and its interval, which is the error bar of the movement. Colored only where that interval excludes zero: blue rises, red falls, gray does not move.

Y_diegetic_superego §3, over the 21,858 with a sexual scene. Levels are medians, so they differ from the finding's table, which prints means; the changes are the finding's medians to the digit. Five sexual prompts, one LLM coder (deepseek-v4-flash). Clean scene is omitted: among sexual scenes every passage is clean, superego or refused, so clean is the superego line inverted, less 128 refusals.
